Collect 10

Kindergarteners don't even realize they're practicing counting and number recognition when they're playing this game!

What you will need:

- 2 dice
- 20 counters
- 2 players

Instructions:

1. Take two large dice that your kindergarteners can easily count numbers on.
2. Give each player a dice, and keep the counters in the center.
3. Both players roll their dice, and compare numbers to see who has the higher number.
4. The player with the higher number takes a counter. If both players get the same number, they both take a counter.
5. The first player to get 10 counters wins the game.

Measuring a Tree

Help kids measure a tree's age with a measuring tape. Though the theory of measurement might not apply to all the trees, it definitely applies to most!

You will need –

- Measuring tape
- A tree

Directions –

- Find a tree that is at least 5 feet tall.
- Have your child wrap the measuring tape around the widest part of the trunk. Help her to measure. Explain that the distance around the trunk of a tree is called the circumference.
- The measurement of the circumference in inches is the tree's approximate age in years!

Rehab & Recovery. Sleep More, Lift More. The most basic source of recovery is free and easy, powerful enough to improve your strength and conditioning without.
